

VirusTC Global Network Matrix

Integrated Telehealth Hub Network: Multi-State Centers & International Facilities Trained in High-Burden Pathogen Containment and Advanced Regenerative Medicine Integration.

Domestic Core Centers (United States)

Institution / Location	Specialized Center Name	Functional Integration / Protocols
UW Harborview Medical Center	Regenerative Medicine Dept	Trauma Transfer, Containment, Fluid Dynamics Integration
NYU Langone Health	Center for Regenerative Medicine	Tissue Repair, Multi-Modal Image Processing Controls
UCLA Health	Broad Stem Cell Research Center	Biomimetic Scaffolding, Cross-State Telehealth Routing
Louisiana State University (LSU)	Regenerative Medicine Division	Tropical Pathogen Trauma, Vector Isolation Systems
Kansas State University	Stem Cell & Regenerative Biotech	Agricultural Synthesis Gating, Organic Processing Controls
University of Michigan (U Mich)	Center for Tissue Engineering	Macromolecular Engineering Analytics, Telemetry Mapping
Palisades Clinical Facility (CA)	Palisades Advanced Regenerative Core	Regional Telehealth Command, Multi-State Operations
Florida State University (FSU)	Institute for Successful Longevity Core	Immunocompromised Oncology Care Protocols
UNLV (Nevada)	Personalized Medicine Integration	Cross-State Compact Triage, Secure Patient Ledgers

International High-Containment Facilities

Jurisdiction / Nation	Facility Framework	Infectious Protocol Mapping Vector
Israel	Tel Aviv / Haifa Regenerative Core	Advanced Cell-Therapy Isolation & Biosecurity Sourcing
Sudan	Khartoum Tropical Medicine Hub	High-Burden Pathogen Field Deployment, Acute Trauma Teams
Greece	Athens Biomedical Research Network	Phytochemical Stability Indices, Marine Model Tracking
Vietnam	Hanoi Clinical Containment Center	Vector Containment Interfaces, Organic Botanical Logistics
Russia	Novosibirsk Advanced Systems Wing	Cryogenic Storage Tracking, Rigid Pathogen Isolation Protocols
Egypt	Cairo Regenerative Infrastructure	Host Cellular Integrity Systems, Emergency Transfer Routing
